Preface (v)

Acknowledgements (vii)

CHAPTER 1

Preformulation and Formulation Development

1. INTRODUCTION

1.1 Importance of Preformulation and Formulation Development in Drug Development 1

1.2 Overview of the Drug Development Process 3

2. PREFORMULATION STUDIES

1.2 Definition and Objectives of Preformulation Studies 4

1.3 Physicochemical Properties and their Significance 4

1.3.1 Solubility and Dissolution 4

1.3.2 Partition Coefficient 5

1.3.3 Crystal Properties and Polymorphism 5

1.3.4 Stability and Degradation Pathways 7

1.4 Biopharmaceutical Properties 7

1.4.1 Permeability and Absorption 7

1.4.2 Bioavailability and Bioequivalence 8

1.5 Regulatory Requirements in Preformulation 9

1.5.1 ICH guidelines (Q6A, Q8, Q9, Q10) 10

1.5.2 Quality by Design (QbD) Approach 11

1.5.3 Design of Experiments (DoE) in Preformulation 12

3. FORMULATION DEVELOPMENT

1.6 Solid Dosage Forms 13

1.6.1 Tablets 13

1.6.2 Capsules 16

1.6.3 Regulatory Requirements for Solid Dosage Form 17

1.7 Liquid Dosage Forms 19

1.7.1 Solutions, Suspensions, and Emulsions 19

1.8 Semi-Solid Dosage Forms 23

1.8.1 Ointments, Creams, and Gels 23

4. RECENT ADVANCES AND CURRENT KNOWLEDGE

1.9 Novel Drug Delivery Systems 28
1.9.1 Nanoparticulate Systems 28
1.9.2 Liposomes and Lipid-Based Systems 28
1.9.3 Polymeric Drug Delivery Systems 29
1.10 Continuous Manufacturing and Process Analytical Technology (PAT) 29
1.11 3D Printing in Pharmaceutical Formulation Development 30
1.12 In Silico Tools for Formulation Development and Optimization 30

CHAPTER 2

Manufacturing-Regulatory Requirements Related to Manufacturing Formulation

2.1 Manufacturing Formula 31
2.2 Manufacturing Records 32
2.3 Validation Types 32
2.3.1 Planning of Validation 33
2.3.2 Prerequisites for Validation: Qualification is a Prerequisite for Validation and includes: 33
2.3.3 Validation Protocol 33
2.4 Validation Process and Equipment 34
2.4.1 Steps in Equipment Validation 34
2.4.2 Assembling a Validation Protocol 35
2.4.3 Product Validation 36
2.4.4 Installation Qualification — Equipment 37
2.4.5 Operational Qualification — Equipment 37
2.4.6 Preventive Maintenance 38
2.4.7 Microbiological Challenges 39
2.5 Cleaning Validation 39
2.5.1 Introduction 39
2.5.2 Regulations and Requirements 41
2.5.3 Grouping Philosophy in Cleaning

2.6 Analytical Method Validation 44
2.6.1 Quantitative Test for Impurities 44
2.7 Validation Process of Raw Materials and Excipients 50
2.7.1 Selection of Raw Materials and Excipients 50
2.7.2 Receipt and Initial Inspection 50
2.7.3 Testing and Analysis 50
2.7.4 Stability Testing 51
2.7.5 Validation of Analytical Methods 51
2.7.6 Re-evaluation of Raw Materials 51
2.7.7 Documentation and Record Keeping 51
2.7.8 Risk Assessment 52
2.7.9 Ongoing Monitoring 52
2.7.10 Final Approval and Release 52
2.8 Equipment Cleaning and Maintenance 52
2.9 Raw Materials and Control of Raw Materials 54
2.9.1 WHO Guidelines 54
REFERENCES 57

CHAPTER 3

Regulatory Requirements for Packaging Materials

3.1 Evaluating Packaging Materials 64
3.2 Stability Testing 67
3.3 Stability Testing of Solid Dosage Forms According to ICH Guidelines 69
3.4 Stability Testing of Liquid Dosage Forms according To ICH Guidelines 72
3.5 Stability Testing of Parentrals according to ICH Guidelines 75
3.6 Manufacturing Documents 79
3.7 Master Formula and Batch Formula 83
3.8 Records 85
3.9 Standard Operating Procedure (SOP) 90

3.11 In-Process Quality Control (IPQC) of Sterile Dosage Forms 94
3.12 In-Process Quality Control (IPQC) Of Biological Products 96
3.13 Different Standard Operating Procedures (SOPS) for Various Operations 98
Conclusion 102
References 102

CHAPTER 4

Clinical Trials

4.1 Purpose of Clinical Trials 104
4.2 Phases of Clinical Trials 104
4.3 Important Elements of the Clinical Trials 105
Conclusion 115
Reference 115

CHAPTER 5

Intellectual Property Rights

5.1 Guidelines of IPR 117
5.2 Examples of IPR In Pharmaceutical Industry 119
5.3 National Guidelines of IPR 121
5.4 National and International Coordination 123
5.5 Inter-National Guidelines of IPR 123
Conclusion 126
References 127

CHAPTER 6

Patent

6.1 Patent 128
6.1.1 Types of Patents 128
6.1.2 Patent Process 128
6.2 Patent Law and Regulations 129
6.3 Procedure for Obtaining and Writing Patent

CHAPTER 7

Quality Assurance

7.1 GMP – Good Manufacturing Practices 137
7.2 Current Good Manufacturing Practices (CGMP) 139
7.3 USFDA Guidelines for Finished Pharmaceutical Product is given Under 21CFR Part 211 140
7.4 Good Laboratory Practice 143
7.5 Elements of USFDA GLP For Non Clinical Lab Study 144
7.6 Organisation 146
7.7 Sanitation 152
7.8 Environment Control 155
7.9 Contamination Control 156
7.10 Personnel 159
7.11 ICH (International Conference on Harmonization) 161
7.12 International Organization for Standardization 166
References 172

CHAPTER 8

Quality Control Laboratory

8.1 Basic Requirements of QC Laboratory 174
8.2 Responsibilities 174
8.3 Good Lab Practices 178
8.4 Routine Controls 178
8.5 Analytical Instruments 180
8.6 Protocol for Non Clinical Testing 181
8.7 Control on Animal House 182
8.8 Quality Control Documents & Records 184
8.9 Audits of QC Facilities 185
8.10 Finished Product Release 187
8.11 Quality Review (Review of Records) 188
8.12 Batch Release Documents 189
8.13 Quality Audits 191

CHAPTER 9

Distribution

9.1 Handling of Returned Goods 196

9.2 Recovered Materials 198

9.3 Reprocessing 200

9.4 Handling Complaints 203

9.5 Evaluation of Complaints 206

9.6 Related Records & Document Evaluation 209

Conclusion 212

References 212

CHAPTER 10

Total Quality Management 214

Conclusion 280

References 280
