CONTENTS

CHAPTER	INDEX	PAGE NO
Chapter 1	**Introduction to Cryptography and Blockchain**	1 - 31
1.1	Overview of Cryptography	
1.2	Blockchain Mechanisms and Networks	
1.3	Transactions and Blocks in Blockchain	
Chapter 2	**Bitcoin and Cryptocurrency**	32 - 60
2.1	Overview of Bitcoin and the Bitcoin Network	
2.2	Bitcoin Mining Process and Developments	
2.3	Bitcoin Wallets and Their Types	
2.4	Decentralization and Hard Forks in Bitcoin	
2.5	Ethereum Virtual Machine (EVM) and Merkle Trees	
Chapter 3	**Introduction to Ethereum**	61 - 97
3.1	Introduction to Ethereum Blockchain	
3.2	Consensus Mechanisms in Ethereum	
3.3	Setting up MetaMask and Ethereum Accounts	
3.4	Transactions and Ether Management in Ethereum	
Chapter 4	**Introduction to Hyperledger and Solidity Programming**	98 - 138

4.1	Introduction to Hyperledger and its Components	
4.2	Hyperledger Fabric and Composer	
4.3	Distributed Ledger Technology and Its Challenges	
Chapter 5	**Blockchain Applications**	139 - 172
5.1	Blockchain in the Internet of Things (IoT)	
5.2	Blockchain for Medical Record Management	
5.3	Blockchain and Domain Name Service (DNS)	
5.4	Blockchain Use Cases in Digital Currency	
Chapter 6	**Blockchain Security and Privacy**	173 - 202
6.1	Blockchain Security Principles	
6.2	Cryptographic Techniques for Blockchain Security	
6.3	Privacy Issues in Blockchain	
6.4	Zero-Knowledge Proofs and Their Use Cases	
6.5	Zero-Knowledge Proofs and Their Use Cases	
Chapter 7	**Smart Contracts and Decentralized Applications (DApps)**	203 - 236
7.1	Introduction to Smart Contracts	
7.2	Writing and Deploying Smart Contracts	

7.3 Decentralized Applications (DApps) Overview

Chapter 8 Future Trends in Blockchain Technology 237 - 275

8.1 Blockchain in Supply Chain Management
8.2 The Role of Blockchain in Financial Services
8.3 Blockchain in Healthcare and Identity Management
8.4 Blockchain and Artificial Intelligence (AI)
8.5 Quantum Computing and Blockchain's Future
8.6 Regulatory and Legal Challenges for Blockchain
